

PistenBully[®]

600 Select

PistenBully 600 Select

Completely reconditioned,
as good as new, with full
new vehicle warranty

PistenBully[®]

Sustainably good: for you and the environment!

All PistenBully vehicles are extremely robust and built to last, because we are convinced that quality always pays off. PistenBully still cut a fine figure even after many hours of work and they deserve to shine like new once again. And we don't just mean on the surface, but down to the smallest detail. All PistenBully 600 Select vehicles are completely reconditioned in-house by the original manufacturer and that includes the engines being serviced at the Mercedes-Benz factory.

Our Select concept is based on two important aspects: firstly we offer you an outstanding alternative to a new vehicle at an unbeatable price. And secondly, we see this extension of the product life cycle as an important part of our environmental and social responsibility.

Because we believe in the quality of our work, we give you a full new vehicle guarantee on your PistenBully 600 Select to ensure you are convinced by it as well.

Jens Rottmair
Chief Executive Officer

Raimund Mayer
Head of Service

PistenBully 600 Select

Completely reconditioned, as good as new, with full new vehicle warranty

The PistenBully 600 Select offers you lots to smile about. From the high quality standard of the work and the parts used, the new vehicle warranty and the extensive equipment, to an attractive financing and service package*.

Additionally: because the servicing work is such a lengthy process, we only sell a limited number of PistenBully 600 Select – based on the expected demand from the market. This means we can react to demand immediately without a waiting period, ensuring that a Select is always available for you.

Last but not least, the environment also benefits from PistenBully 600 Select, which is another reason to be happy, because valuable resources are conserved. The PistenBully Select concept is part of BLUE IQ – Kässbohrer Geländefahrzeug AG's philosophy designed to ensure a responsible approach to the future (see page 20 for more details).

TOP Cost-effective

The PistenBully premium machines in new vehicle quality are available at an extremely attractive price.

TOP Quality in every detail

PistenBully 600s are serviced in Laupheim by experienced Kässbohrer service engineers according to the highest quality criteria.

TOP Fully restored engine

The Mercedes-Benz engine is "factory-restored" by its manufacturer. That means: completely disassembled and all parts tested. The engine is then reassembled from scratch so it becomes "like new".

TOP Extensive equipment

Each of the vehicles is equipped as standard with xenon lights and solid tires for greater endurance. New combined tracks, an Alpine or ParkFlexTiller (a new tiller if built in 2007 or earlier, a reconditioned tiller if built from 2008 onwards), plus a completely reconditioned AllWayBlade, are all included in the equipment package.

TOP Tested safety

Every PistenBully 600 Select is quality tested by Kässbohrer. Before they leave the factory our PistenBully 600 Select are put through the same testing process as new vehicles.

TOP Full new vehicle warranty

PistenBully 600 Select get a full factory warranty just like all new vehicles produced in Laupheim.

TOP Attractive financing deals

PistenBully 600 Select not only offers a coherent overall concept, but is also particularly appealing thanks to its tailor-made financing options. In Germany, for example, with an effective interest rate from 1.99 % p.a. (for other countries on request). Let us advise you.

TOP Training included

Every buyer receives a training voucher to ensure proper handling of their PistenBully 600 Select.

* depending on the different countries

PistenBully 600 Select

Making new from old

Appraisal

Detailed testing report

First the PistenBully is appraised by the workshop foreman. All technical functions are reviewed, a test report is created and the required action is defined in a to-do list in collaboration with the experts in the workshop.

Vehicle disassembly

Inspection and replacement of damaged parts

The vehicle is then fully disassembled in our specialist workshop and all the main components are replaced. All parts are tested and damaged parts are repaired. Retrofits are performed if there have been technical improvements since the vehicle was first built.

Fine-tuning the wear parts

High-pressure hoses and electrical connectors are also repaired during assembly.

General engine reconditioning

Engine serviced in-house by Mercedes-Benz

The diesel engine is serviced by Mercedes-Benz and returns to us fully reconditioned – with warranty from Mercedes-Benz. The same goes for the hydraulic pumps and the planetary gear. These too are sent back to the manufacturer for a thorough overhaul.

Technical data	600 / 600 W	600 Polar / 600 W Polar
Type	Mercedes-Benz OM 460 LA	
Cylinders	6	
Cubic capacity	12.8 l / 3.38 gal 12,800 ccm / 781.11 cu.in	12.82 l / 3.39 gal 12,820 ccm / 781.32 cu.in
Power output (ECE)	295 kW (400 hp)	360 kW (490 hp)
Max. torque	1,900 Nm at 1,300 rpm	2,200 Nm at 1,300 rpm
Fuel consumption	from 20 l/h / 5.3 gal	
Fuel tank capacity	220 l / 58.1 gal	
Emission standard	Euro 3A and EPA TIER 3	

PistenBully 600 Select

Making new from old

Vehicle assembly

Completion

The vehicle is completed with new and reconditioned parts. During this process we insist on the same quality standards as for new vehicle production.

Paint finish

New surface protection

While that is going, on the driver's cab is repainted and the vehicle is refinished with a seamless anti-corrosive coating.

Cockpit overhaul

Cleaning and replacement

The final stages complete the PistenBully 600 Select once again. The cockpit is completely cleaned. The joystick, steering wheel and any damaged parts are replaced.

You can also watch the full
reconditioning of the
PistenBully 600 Select as a film:

Completion cabin

Retrofits

The most important control element, the joystick, is replaced with a new one. Any cockpit elements that have been redesigned or improved are also replaced. The latest version of the software is installed too.

New driver's seat

The cab also gets a new driver's seat and new headlining – ultimately drivers should feel as comfortable in their workstation as they would in a new vehicle.

Commissioning

The fully reconditioned cab is put in place, the vehicle is filled with all the necessary supplies and then commissioned.

PistenBully 600 Select

As good as new

Testing and completion

At the end of the multi-week reconditioning process, each PistenBully 600 Select is put through its paces – just like the new vehicles – in the PistenBully test facility. The vehicle is now ready for its “second” life. Every PistenBully Select meets the highest Kässbohrer quality standards. In technology and service alike.

AllWayBlade, tiller and tracks

The AllWayBlade is completely restored separately – metal damage is repaired, and the blade is repainted and given new piping. The old tracks and the tiller are disposed of. The vehicle gets new combined tracks, an Alpine or ParkFlexTiller (a new tiller if built in 2007 or earlier, a reconditioned tiller if built from 2008 onwards).

New vehicle warranty

PistenBully 600 Select get the full factory warranty like all new vehicles: under the basic warranty – spare parts are supplied and damaged parts are repaired free of charge in the first year / 1,000 operating hours*, and the costs of the removal and installation work and travel costs (500 operating hours) are covered by Kässbohrer. In the second year / 2,500 operating hours*, spare parts are supplied and damaged parts are repaired free of charge under the so-called "component warranty".

*depending on what comes first

**PistenBully 600 Select –
a sensible investment.
You'll find a selection
of fresh Select vehicles
on our website:
www.pistenbully.com/select**

Powerful, young and beautiful – the PistonBully 600 Select once again cuts a perfect figure on the slopes.

PistenBully Service

We are here. Always.

Day after day, we are working to make PistenBully even better. That applies to service too: we deliver spare parts as quickly as possible to every part of the globe. 365 days a year, 24 hours a day. We want to convince with our individual services, inspiring customers to go for the whole package.

- Over 25,000 original spare parts in stock
- All spare parts of OEM quality
- Tested safety and high reliability
- Evaluation of telemetry data
- Service hotline: 24 hours a day, 7 days a week
- Express delivery across Europe: overnight. Worldwide: max. 3 days
- Expert advice on spare parts
- Digital and up-to-date spare parts catalogue incl. order function
- Spare parts for machines up to 25 years after series discontinued
- Comprehensive advice and training concept
- Advice on economical and eco-friendly use of your fleet
- Technical training for fast maintenance right in the ski resort
- External customer support – from the North Pole to the Antarctic

Global and yet very close

To this end, we now have over 130 service stations and agencies around the world. This means we are always on hand for our customers. We meet the challenges and are continually working to improve our products and services. Because we know: smooth, cost-effective operations are the top priority.

You'll find more information on our service concept at:
www.pistenbully.com/service

PistenBully. For the snow of tomorrow.

Quality, reliability and partnership for over 45 years.

A company can only improve with genuine passion and a strong team. A passion for engines, machines and technology is inextricably linked to the Kässbohrer business. Our success essentially rests on these foundations: close cooperation with our customers, simple and fast solutions and a qualified and committed team.

A PistenBully is and remains something special. It encompasses new ideas, technologies and improvements that make it an efficient partner on the slopes. You can rely on the quality of our products made in Germany. And on the fact that sustainability and a responsible approach to people, the environment and resources are an integral part of our philosophy.

Blue IQ Responsibility for people and the environment

With our corporate philosophy, BLUE IQ, we are working actively with our customers to shape the future.

As the global market leader we are convinced that technical innovations must be incorporated into integrated concepts. That's why we take the economic, ecological and social aspects into account in addition to technical factors. The result is a well-thought-out and coordinated portfolio. For more customer benefits, greater cost-effectiveness and a better environment.

The PistenBully 600 Select are an essential part of BLUE IQ. With PistenBully Select we double the service life of the product by reconditioning the vehicle and, in so doing, achieve notable savings in valuable resources and energy. The customer benefits from a high-quality product at an attractive price.

A responsible future
