

Steel track

SIMPLE. RUGGED. TOUGH.

STEEL TRACK

The closed sections are made from highly rigid, low-wear fine grain steel. The sharp profile edge penetrates even hard surfaces well. With a full complement of spikes, the steel tracks have good climbing performance and lateral stability.

AREAS OF APPLICATION

Steel tracks are designed for extreme tasks, maximum thrust in steep terrain and on ice and rock. Even on heavy machine-made snow, they are perfectly suited for preparation and dozing work.
