For preparation of icy and encrusted slopes

# Snow Cutter

## Use

For ripping up icy and encrusted slopes, renewing lift routes and removing glacier surface ice. The snow cutter can be used with an All-Way-Blade.

## Operation

The toothed bar is lowered by means of the pivoting ram, and breaks up hard icy slopes into large lumps which are further reduced in size by the tracks and then restored to skiing condition by the tiller.

The toothed bar swings back automatically if it strikes rocky ground. As with the All-Way-Blade, hydraulic adjustment is by means the front hydraulic control valve and the quick-mount-system.

## Design

Sturdy toothed bar made of wear-resistant steel. Full-width shaft to ensure uniform adjustment.

The snow cutter is designed as an adapter, to be located between the quick-mount system and the All-Way-Blade, and can be installed and removed at any time without difficulty.
